Subject: antitrust lawsuit

Microsoft is a creative, tough company which may, or may not, have had some anti-trust practices in the past, but it is time to move on. The company has worked hard to develop products that people need and use. Just because some other companies are unable or unwilling to work as hard and creatively, they should not be allowed to succeed by bringing Microsoft down. This company has done much for the economy and needs to be allowed to move on past this lawsuit. Please find in favor of the Microsoft settlement as presented.

Thank you,
